Sam Lysinger  
Computer Consultant

Dear Sam:

When we were introduced by Bruce Gill in December of 2010 I was anxious to meet you to address my computer "issues".

Although none of my computers needed emergency assistance I knew that all three of them were slow and needed attention.

We created a wish list and you addressed every issue including software and hardware.

Now I can:

Send emails easily from my contact management software  
Easily connect to and use the wifi services  
Boot up my bookkeeping software quickly

You did all that without once making me feel less than intelligent

Thanks for all your help!
